GT60 2PE

4th generation Intel® Core™ i7 processors

The 4th generation quad core processor platform, represents superior performance over previous generations. The CPU performance has increased by 3%-7%, while the overall platform is 15% more powerful. Additionally, the GPU performance of 2D and 3D visuals, is even more noteworthy, with an average increase of over 30%. There have also been significant advances in user experience and battery life. Moreover, it employs a more advanced encryption program to help businesses enhance information security and to protect your BIOS/FW from attacks by malware.

NVIDIA GeForce GTX 880M

The NVIDIA GeForce GTX 880M leverages NVIDIA's revolutionary new architecture to deliver extreme performance in comparison to the previous generation. Compared to the GeForce GTX 780M, users allow themselves to get over 10%-15% faster and more performance with lower temperature and watts. Turn on lightning-fast antialiasing in a huge variety of games automatically. Get maximum gaming images and best compatibility with NVIDIA graphics. Feel the real difference with the NVIDIA PhysX® technology, bringing games to life with dynamic, interactive environments.

SteelSeries Keyboard

There is no room for error when it comes to serious gaming. Play flawlessly with extreme anti-ghosting allowing for simultaneous key presses and rapid response times. Personalize your rig with unlimited customization possibilities with 3 color zones, 5 pre-configured settings, and over thousands of color options giving you the power of choice. This enables you to stand out at a LAN party!

SteelSeries Engine

SteelSeries Engine is the unique feature which enables gamers to perform specific in-game combinations by pressing one pre-assigned button, allowing outstanding in-game performance.

XSplit Gamecaster

XSplit Gamecaster is the recording & streaming application for gamers. Allowing gamers to easily record their own gaming moments and share the live gameplay sessions with friends, family, or the world through Twitch, YouTube, UStream and more.

Super RAID 2

Extreme storage for extreme gamers. The MSI exclusive Super RAID 2 with three 6GB/s mSATA SSD's configured in RAID 0 delivering over 1500 MB/s of read speed for the fastest load times possible; three times faster and three times better. Jump into your games instantly while others are left waiting on the load screen.

Cooler Boost 2

A smart, quiet, and highly efficient single fan cooling solution will keep you in the heat of battle without breaking a sweat. This one-touch instant cooling feature lowers the average temperature by 8°C with a shared heat pipe technology while saving battery life for a longer, and better gaming experience.

Killer™ DoubleShot

Designed with exclusive networking optimizations, Killer™ DoubleShot offers up to 5x better latency than the competition and has the horsepower to handle multiple data streams at once. With Visual Bandwidth Control™, you'll see what those streams are doing in real-time for superior control over your precious bandwidth. Killer™ DoubleShot gives you unequalled hardware and software technology for your notebook Wi-Fi® and Ethernet connections

Wide Viewing Angles

Gaming positions may vary much during gaming, to create an ideal gaming situation the viewing angle has to be perfect. With this new feature the need to adjust the notebook lid during gaming is reduced. Experience accurate, vivid colors and consistent brightness levels whether you're looking at the screen from above, below, the front or the side. .

3K LCD Display

3K LCD display takes image clarity to a whole new level with pixel resolution. Compared to full HD LCD display, the images are amazingly much more sharp and vivid. When you're playing games, you will have a breathtaking and brilliantly true-to-life viewing experience.

Display Surround Modus

The GT60 features 3 external screen display capabilities, allowing you to output to 3 displays simultaneously using HDMI 1.4, and mini Display-Port 1.2 port. Multiple displays can replicate an image on multiple screens, extending the picture to the left and right edge of your field. Creating a panoramic viewing experience.

Dynaudio

Dynaudio, one of the most high-end sound systems brands, has been integrated into MSI gaming laptops. The premium speakers have been precisely fine-tuned for authentic sound reproduction quality and a built-in subwoofer has been added for a truly immersive experience.

Audio Boost

The MSI Audio Boost design enhances the output sound detail and sound stage by 30% more. Working in sync with an audio power amplifier (AMP) provides maximum sound fidelity for best, and sonically accurate headset experience. Detail is everything! Hear any sound in game! Response faster!!
