GS30 Shadow X GamingDock

NO.1 IN GAMING

msi®

Intel 4th Generation Quad Core Processor

The latest 4th generation quad core processor platform, representing superior performance over previous generations. The CPU performance has increased by 3%~7%, while the overall platform is 15% more powerful. Additionally, the GPU performance of 2D and 3D visuals, is even more noteworthy, with an average increase of over 30%.

Intel Iris Pro Graphics 5200

Delivers mainstream discrete-level performance to play your favorite games. Intel graphics outperforms 70% of the most popular Desktop discrete cards.

Stunning Storage Speed

The first Super RAID design—one notebook with two mSATA SSD RAID 0 units, is yet another world first courtesy of MSI. Two mSATA SSDs and one HDD can be installed in the same laptop without the need to expand the size of the laptop, increasing read, write, and saving speeds.

Enhanced Wrap Around Sound

Optimized software solutions in particular for wrap around sound, human voices, virtual bass, and low quality audio sources. Sound Blaster Cinema and MSI's superior sound system complement each other exceptionally well.

Best live streaming app ever

XSplit Gamecaster lets you easily record your gaming experience and broadcast it live to Twitch, YouTube, UStream and more. It's simple, easy to use and ideal for sharing your gameplay with friends, family or the world - or for capturing those perfect gaming moments, just for the heck of it.

Killer Gaming LAN

The benefit of the Killer Gaming LAN is the "Advanced Game Detect™" technology, which recognizes online game data packs and processes them first, accelerating them in the process. The best weapon against stuttering characters, freeze-ups, and lagging, it vastly improves all the online experience.
