

Product Specification Sheet

Car / Plane 150W Inverter, Slim line style

Part #: APV14UK

Product Description:

Instant power on the move is crucial in today's fast moving business environment. Designed to work within cars and airplanes (where applicable), the Targus Power inverter will convert the DC power produced by these sources into AC power which can be used to power and charge your laptop. Power and charge your notebook, DVD player and other devices (up to 150 Watts) in the car or on a plane, while the USB port allows further simultaneous charging or powering of low wattage USB devices like a mobile phone or PDA. The optional Accessory powering system enables charging of third digital device via separately sold charger and interchangeable tips.

Product Features and Specifications:

- Power and charge your notebook, DVD player and other devices (up to 150 Watts) in the car or on a plane
- Built-in surge protector and auto shutoff
- USB output to enable simultaneous powering or charging of your USB digital devices
