# LACIE

network space

DESIGN BY NEIL POULTON

Central Storage

With the LaCie Network Space, you can centralize all of your files and share them among your networked computers at home or at your small office. Imagine all of the data spread across your PCs and Macs stored in one place. Connect a USB drive or a camera and transfer your files or photos thanks to the extra USB port. You can even back up multiple computers connected to the network to make sure your precious memories won't be lost.

Quick & Easy To Use

Finally, there is a simple, networking storage device that doesn't require setup; just connect it to your network via Ethernet and enjoy using it immediately. Easy-to-use LaCie Ethernet Agent software is included, enabling direct access to your shares from any networked computer. This central storage is built with two shares: one public share that anyone at home can access and another password-protected private share.

Multiple Ways To Access

Your household's digital content is always accessible remotely via FTP. Easily upload your vacation photos to the LaCie Network Space while you're away so your friends can see them thanks to their user login. At home, networked computers can access the iTunes library or stored photos and everyone can stream music or videos from a networked UPnP™ AV certified player or adapter.

Extraordinary Design

Designed exclusively for LaCie by Neil Poulton, the compact LaCie Nework Space has a fashionable, mirror-polished black finish with a unique distinguishing feature - a cool, blue LED strip on its underside that creates an ambient glow. Its smartly engineered design allows for natural heat dissipation and near-silent, fanless operation.

100GB* =

100,000 photos or
40,000 songs or 100 movies**

- Store, back up and centralize your files
- Share content on your local network
- Enjoy your password-protected private share
- Connect and forget – no setup required
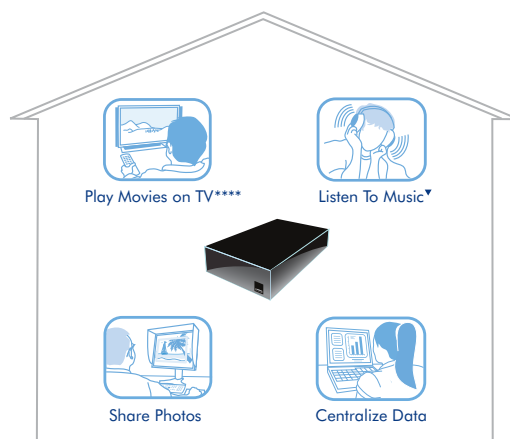

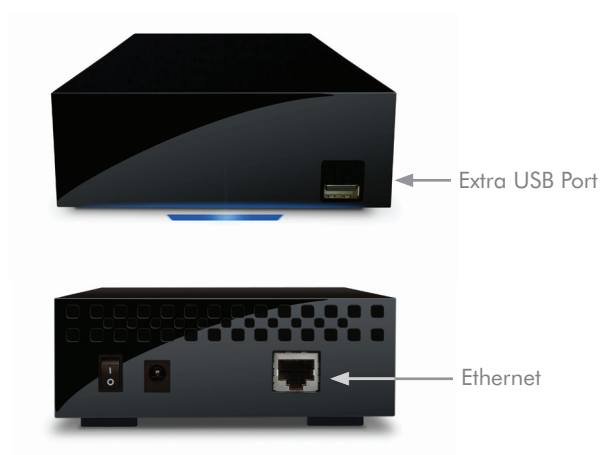

Features

- Media server with file management:
  - Pre-defined shares: 1 public and 1 private
  - Upload, download, back up & transfer files
  - Share photos, music, videos locally & remotely
- Extra USB port for backups & file transfers
- Compact, near-silent design
- LaCie Ethernet Agent: access shares quickly & easily
- UPnP™ AV compatible****
- iTunes server compliant

Extra USB Port

Ethernet

Box Content

- LaCie Network Space
- Ethernet cable
- External power supply
- Utilities CD-ROM
- Quick Install Guide

Play Movies on TV****

Centralize Data

Minimum System Requirements

- Windows® 2000, Windows XP (SP1 & SP2),
  Windows Vista™ / Mac® OS X 10.3 or higher
- PC or Mac equipped with a CD/DVD-ROM drive
- For local use: any computer connected on the local network
- For remote use: any computer connected to the Internet via FTP

Home or Small Office

	LaCie Network Space		
Item Number	301387	301388	301389
Capacity*	500GB	750GB	1TB
Interface	Gigabit Ethernet 10/100/1000 Mbits***		
Extra USB Port	Transfer & back up files to/from an external hard disk		
Store & Share Data	Back up any file from a PC/Mac Share content locally (maximum 5 users at a time) iTunes-compliant server Stream music & video on UPnP media players**** Remote access via FTP		
Dimensions (WxDxH)	4.6 x 7.6 x 1.8 in. / 117 x 193 x 45 mm		
Weight	33.5 oz. / 950 g		
Warranty	2 years limited		

*1GB = 1,000,000,000 bytes. Total accessible capacity varies depending upon operating environment (typically 10–15% less).

**Calculations are based on 1MB/photo, 2.5MB/3-minute MP3 song, and 1GB/movie encoded in MPEG-4 or equivalent codec.

***Gigabit Ethernet implies a theoretical maximum network bandwidth. The drive transfer rate will be lower depending on the LAN configuration.

****UPnP certified digital media adapter or player required.

▾Audio and video playback is dependent upon the codec installed on your computer.
