Speed is what you need for video editing, big design projects, or managing photo shoots and that's what My Book Studio Edition delivers with FireWire 800 and eSATA connectivity. With our automatic backup capability your creative masterpieces will be backed up the minute you save them.

Product Features

Easy to set up, easy to use - Installation is a snap because you don't really install this drive; you just plug it in and it's ready to use. There is no CD to install; the included software loads from the drive the first time you plug it in.

Automatic backup - Back up important projects to multiple destinations including file servers, portable drives, and My Book. Synchronize project files to keep them current and secure. Set it and forget it; every time you save a change it's automatically backed up.

Powerful quad interface

FireWire 400 and 800 - High-performance interfaces that are perfect for Macintosh® computers.

eSATA 3 Gb/s - The ultra-fast eSATA interface gives you speed comparable to a state-of-the-art internal hard drive.

USB 2.0 - For convenience and compatibility among multiple computers.

Formatted for Macintosh - Configured with HFS+ Journaled formatting for complete Macintosh compatibility. Software included requires Mac OS X 10.4.8 or later. Can easily be reformatted for Windows® 2000/XP/Vista.

Capacity gauge - See at a glance how much space is available on your drive. (Works with the USB and FireWire connections only.)

Environmentally friendly - Our environmentally-friendly drive is designed to save power by going into standby mode after 10 minutes of inactivity. When you're ready to use it, My Book wakes up automatically.

SmartPower™ features - This drive turns itself on and off with your computer and Safe Shutdown™ prevents the drive from being powered down until all your data has been written. (Works with the USB and FireWire connections only.)

Designed to keep the drive inside cool - The My Book enclosure's heat dissipating design with Morse Code prevents heat buildup... a notorious data killer. How cool is that?
