

CMFUSBAC-128GBGT

Corsair® Flash Voyager® GT

128GB USB Drive

Intro Phrase / Tagline

The World's Fastest and Most Convenient High Capacity USB Flash Drive.

The ideal solution for taking massive amounts of data on the move

Nearly 75% smaller than a typical portable USB hard disk drive, the Flash Voyager GT 128 is the most convenient way to transport huge amounts of data, including high-resolution photos and artwork, HD video footage, massive databases, or even entire music collections. And with its blazing 32MB per second read speed and 28MB per second write speed (the performance is essentially limited by the speed of the USB bus), it rivals the fastest portable hard drives, as well.

Ad Copy – Print / Web

The Flash Voyager GT 128 outperforms other high capacity USB flash drives by a wide margin, delivering 2.5 times the sequential write speed and a stunning 37 times the random write performance! Its ruggedized rubber housing is designed to provide durability and enhanced protection for your valuable data.

Never before has so much performance and storage been packed in to such a convenient form factor. The Flash Voyager GT 128 needs no special drivers, no external power, and no cables, making it the world's fastest, most convenient high capacity storage solution for anyone who needs high-performance, rugged portable storage.
