Wireless Extreme for Mac® and PC
N600 Wireless Dual Band Gigabit Router

Extreme performance, advanced features, from the leader in home networking.

PRODUCT OVERVIEW

The NETGEAR Wireless Extreme for Mac computer and PCs (WNDRMAC) is an N600 wireless dual band gigabit router ideally suited for high-performance wireless Internet access and sharing. The Wireless Extreme router is DLNA-certified for fast multimedia streaming to home theater devices and great for high-speed multiplayer online gaming. With the Simultaneous Dual Band feature, the router delivers the ultimate in flexibility and performance by providing two independent, dedicated networks. The router features ReadySHARE® USB storage access for easy sharing a USB hard drive with Macs and PCs and ReadyShare Printer for printing to a connected USB printer wirelessly.

- **Compatible with Mac and PC computers**—Enjoy true compatibility with any Mac and PC computer
- **Simultaneous Dual Band**—Offers twice the bandwidth with better connection and less interference
- **Fast multimedia streaming**—Delivers Wireless-N speed and performance for streaming video, multiplayer online gaming and simultaneous downloads
- **Live Parental Controls**—Centralized parental control for all of your connected devices
- **DLNA-certified**—Stream media to DLNA-certified HDTVs, Blu-ray players and game consoles
