FEATURES

Mute Fan Technology - 0db –Silent gaming

Mute Fan Technology intelligently turns off the fan below 60°C , providing silent gaming during medium and low-load while reducing power consumption.

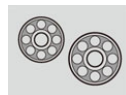

Back Plate

The metal back plate is extremely rigid to strengthen the card to prevent PCB bending, and the hollow area allows heat release promptly to enhance airflow.

Triple Fan

The 3X 90mm optimized static pressure fan design provides more air flow and better cooling circulation.

Two Ball Bearing - 4X greater longevity

The cooling fan utilizes two-ball bearing technology, increasing the longevity of the fans by up to 4 times.

BIOS Switch Button

Simply press the button. When the light is on, you are already on OC mode which has increased the performance. Just immerse yourself in your games!

AMD RDNA™ 2 Architecture with Hardware Raytracing

With enhanced compute units, delivering hardware raytracing and variable rate shading, AMD RDNA™ 2 Architecture is the foundation of the next generation of enthusiast gaming platforms from desktops to gaming consoles.
