MS-2

Gaming Mouse

Model Overview

Func MS-2 is a comfortable, ergonomically designed mid-size gaming mouse, built to handle different grip styles without causing hand strain or stress. Equipped with an LED optical sensor and large Teflon feet, it features optimal tracking capabilities and a superb glide. The unique T+4™ thumb button placement allows for easy accessible actions which facilitates faster and more accurate commands. Additionally, the Func MS-2 features 10 programmable buttons and scroll wheel, 3 user profiles, macro editor and customizable LED-lightning, making it completely customizable to your personal preferences. How do you like to game?
