

Tasty bass

Small Speakers, Big Bass. You won't hear any enhanced super-mega-hyper-monster boomy bass from these speakers. The low end from the Audioengine 5 is real bass, very near to originally-recorded music. From rap to classical to movies, you'll get tight, punchy bass with an awesome growl that will make you smile - regardless of the volume level.

Brawn, Brains, and Beauty

Kevlar woofers for powerful bass, silk dome tweeters for smooth highs, built-in power amplifiers, truly useful connections, and a clean industrial design all allow the Audioengine 5 to integrate perfectly in your living room, bedroom, or desktop. Custom-designed and handcrafted wood cabinets with high-gloss professional piano finish make the Audioengine 5 a true work of art.
