Introducing ÅSKA

Bluetooth® Speaker

 **Bluetooth™ 4.0**

*Hey!, Bluetooth® 4.0
= is the best transmission standard*

Introducing ÅSKA

Bluetooth® Speaker

Moo's ÅSKA main selling points

Forget everything you have ever heard from a mini Bluetooth speaker, Åska by Moo has arrived.

Åska, which means thunder in Swedish, more than lives up to its name sake.

The patented suspension low-frequency resonance system technology changes the traditional way that this type of speaker works to greatly improve sound quality and volume.

With its 52mm 5 W speaker element, 2pcs*800 lithium batteries, Bluetooth 4.0 all inside an attractive high quality design enables this little speaker to punch well above its weight and price class, and won't disappoint

Technical Advantages:

- Suspending Low Frequency Resonant System
- Low Frequency Tracking Technology
- Amplifying without Distortion Technology
- Dual amplifiers

”First with a dual power supply system”
