

AVerTV Mobile 510 for Android™

Access DVB-T/T2 Signal Through Your Smart Device

The new generation of AVerTV Mobile series is coming with DVB-T2 signal now! With its compact design, AVerTV Mobile510 requires only one simple plug-in to turn your Android device into your personal TV. Plus, experience DVB-T/DVB-T2 TV through the complementary TV-watching app – **AVerTV Mobile II** and no Internet connection required!

The exclusive high-gain antenna with excellent TV signal reception is included to guarantee users a superior TV-viewing experience, especially for outdoor use. You can watch DVB-T/DVB-T2 TV while camping, picnicking, waiting for a bus or a friend, and more.

A number of PCTV functions are supported, including auto detection for DVB-T/DVB-T2 TV signals and auto scans for full channels. Recording, bilingual audios, and an electronic program guide (EPG) are offered as well.
