## **Play your PC Games in DTS!**

## Theatron Connection Diagram

- 1 Digital Audio Cable
- Play your games as usual
- Theatron converts into DTS
- Your receiver understands
- 5.1 Audio at anytime
- Better sound, better games!

## TOSLINK & COAX Digital Out

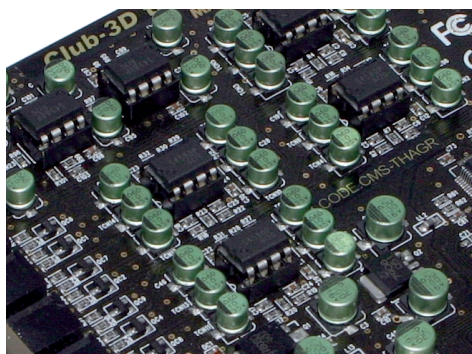

### Why Theatron for HiDef Audio?

Today's Home Cinema Receivers, even the cheapest ones, use Digital to Analogue (D/A) convertors that are better than the most expensive consumer PC soundcards. But these D/A convertors only understand Dolby Digital (DD) or DTS. Today's PC Games are making use of EAX or Direct Sound 3D. When connected digitally to a Home Cinema Receiver it will jump to stereo mode. To overcome this, you have to connect your PC soundcard analog to your Home Cinema Receiver. This means a lot of cables and poor sound quality as you cannot use the high quality D/A convertors of your Home Cinema Receiver.

This will not happen when using Theatron. Theatron is designed to work with all Home Cinema receivers up to high-end. Club 3D Theatron always offers a digital compatible multi channel audio stream to your DD/DTS Home Cinema Receiver.

### Real-Time Dolby Digital & DTS Encoding

Software RTCE (Real-Time Content Encoder) technology licensed by Dolby® Laboratory and DTS Interactive, it can supply the best digital 5.1 (AC-3) or DTS bit stream audio quality utilizing S/PDIF Link. It makes the Dolby-and DTS -approved PC- Media Center- come true and will guarantee maximum performance and pleasure from your games and media files.

### High Quality PC Audio Fidelity

Excellent analogue audio circuitry to guarantee optimal sound quality and performance for music, movies and games.

### Dolby® Virtual Speaker Technology

Latest Dolby® Virtual Speaker solution bringing amazing virtual surround sound fields via general two speakers.

#### Supported Formats:

- CONNECT
- NEO:PC / 6
- HIGH DEFINITION AUDIO
- INTERACTIVE
- ES

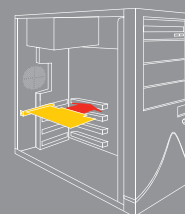

#### Specifications:

- RTCE licensed by Dolby® Laboratory.
- Dolby Digital LIVE
- DTS Interactive, Connect, NEO-PC.
- 8 channel output Dolby® Digital EX and DTS® ES.
- 7.1 channel 24bit /96KHz output.
- HRTF 3D positional sound enhancement.
- Karaoke: Mic Echo, Key-shifting, Vocal cancellation.
- Magic Voice: games, and messenger applications.
- Multi-speaker output to 2 / 4 / 5.1 / 7.1 speakers.
- PCI2.1 and PIC 2.2 compliant
- Microsoft® PC99 specification
- Microsoft® ACPI 1.1, APM 1.2 and PPM1.1
- HRTF-base 3D positional audio
- DirectSound™3D
- EAX v2.0 and A3D v1.0
- General MIDI (GM) compatible
- Enhanced Full Duplex

#### Connections:

- Internal : CD Audio In , AUX In
- Front / Rear / Center & Sub / Back surround - out
- Line-In / Mic-In
- SPDIF Out (TOSLINK & Coax)

#### Easy Installation Guide

Everyone can upgrade their computer by using the included Club 3D Easy installation guide.

#### System Requirements

- Intel® Pentium® or AMD™ Athlon™ or compatible
- 128MB of system memory
- Mainboard with free PCI 2.2 slot
- CD-ROM drive for software installation

#### XEAR 3D Audio Console

#### Club 3D Driver CD

#### OS Support

- Microsoft® Windows XP
- Microsoft® Windows 2000
- Microsoft® Windows MCE
- Microsoft® Windows VISTA
