

# SpaceNavigator™ for Notebooks

Portable 3D Mouse

## Control

Micro precision, high speed, sensor for a perfect connection to your digital model.

## Portability

Small footprint and compact size for use anywhere. Included travel case provides protection when not in use.

## A virtual extension of you

Using the SpaceNavigator for Notebooks 3D mouse to navigate 3D models or environments is as simple as holding them in your hand. Slight movement of the controller cap delivers easy and precise control. SpaceNavigator for Notebooks is a companion to the traditional mouse and is operated with the free hand. Your traditional mouse hand is free to select, create and edit.

## Key features

SpaceNavigator for Notebooks is ideal for mobile 3D users or as a second device for those with a SpacePilot or SpaceExplorer in the office.

- **Compact controller cap** – Fingertip connection to your digital model.
- **2 function keys** – Easily customised to your own preference.
