SmartBand summary

SmartBand is Sony's first 24/7 product with completely new interaction possibilities. A band worn on the wrist that monitors your body movements and interacts with your Smartphone (via Bluetooth®) to present your life and movements on screen.

SmartBand count your steps and physical activities when sleeping, walking and running. Set to track your personal goals.

The design is IP58 classed to make it resistant to dust and water. It operates either as a companion to any Android (v4.3 or later) mobile phone or as a standalone device.
