

ROCKI®

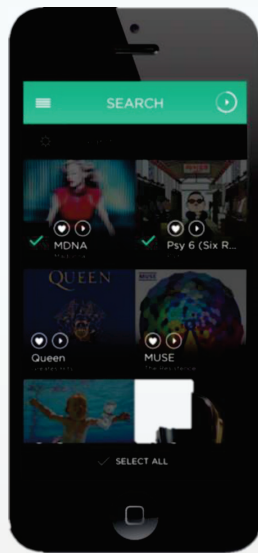

FROM EVERY PHONE
TO ALL SPEAKERS
FOR EVERYONE

MYROCKI.COM

Product Info

The music you love

on the speakers you have

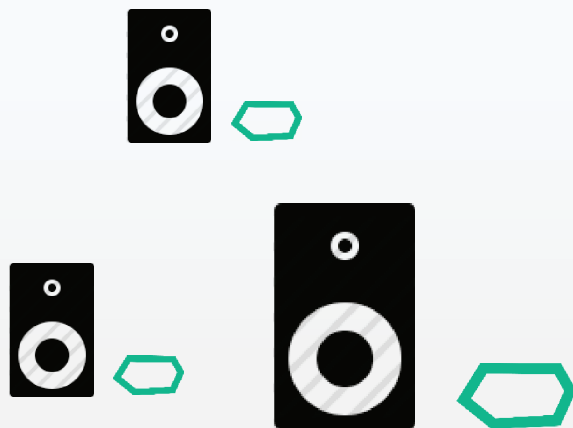

How it works

ROCKI connects to the home WiFi network rather than Bluetooth. ROCKI can stream music anywhere within the range of your WiFi. Just set it up once and never have to pair it again before using it! And, if you receive a phone call or text message your music will play on without interference!

Connect a ROCKI Play to any speaker that has an aux input. For example, HiFi stereo sets, outdated dock-speakers or even PC speakers!

Use the ROCKI app to stream all your music to any or all speakers!

Speakers with ROCKI Play

ROCKI App

Product

Package Contents

All your music

The ROCKI App on Android and iOS will allow you to stream music that is stored on your phone or tablet, as well as that in your synced iTunes library.

 MP3 FLAC

Music Services

We have integrated music services into the ROCKI App so you can stream music from them to any or all ROCKIs.

Expected Fall 2014
