Extremely thin and sleek, the Jumpr Slate 10K is the thinnest battery solution for charging smartphones, tablets and e-readers. In addition, the Slate 10K has the ability to charge smaller devices such as action cameras, MP3 players, and GPS devices. Its dual 2.4 amp outputs allow users to charge two devices at once so you can always make sure all of your devices are powered up. And just like the rest of our EnerPlex line, the Jumpr Slate 10K's rubbery finish adds durability to the battery, giving the user a sense of security when using the product. Finally, the Slate 10K comes with convenient binder holes so users can easily clip the battery into their personal planners, notebooks, and binders. Whether on a long red-eye or pulling an all-nighter in the campus library, stay powered up with the EnerPlex Jumpr Slate 10K.

### POWER UP YOUR DEVICES:
