

Good things come in small packages

The reliability, performance, and versatility of the Antec Performance One series is now available in a stylishly small enclosure, perfect for gamers on the move. The Mini P180 boasts a heat-reducing dual chamber design with room for your microATX motherboard, power supply, and up to 5 hard drives. Sound-deadening multi-layer side panels and silicone grommets ensure quiet computing, while 120 mm and 200 mm fans provide optimal cooling. Top it off with a sleek interior black finish and front USB, audio, and eSATA ports, and you won't believe the quality we've fit into this petite portable case.

Specification:

- No Power Supply included: To optimize the performance of your Mini P180, your choice of power supply is crucial. Antec strongly recommends choosing from our NeoPower or TruePower series.
 - Configurable to support graphics cards up to the 8800
- 8 Drive Bays
 - External 3 x 5.25"; 1 x 3.5"
 - Internal 5 x 3.5" for HDD
- Unique upper and lower chamber structure: the power supply resides in a separate chamber to isolate heat from the system and lower system noise.
- Cable organization for added convenience and better airflow
- Innovative three-layer side panel (aluminum, plastic, aluminum) dampens system generated noise, making this one of the quietest cases available
- Cooling System:
 - 1 rear (standard) 120mm x 25mm TriCool Fan
 - 1 top (standard) 200mm x 25mm TriCool fan
 - 2 front chamber (optional) 120mm Fan
 - Exterior speed control switches
- Motherboard: up to microATX
- 4 Expansion Slots
- Double hinge door designed to open up to 270°
- 2 x USB 2.0, 1 x eSATA, Audio In and Out (AC' 97 and HDA).
- 0.8mm cold rolled steel for durability through the majority of chassis.
- Box Dimensions: 43.5 (H) x 21.2 (W) x 43.6 (D) cm
- Case Dimensions: 51.0(H) x 28.3(W) x 51.5(D) cm
- Net Weight: 20.9 lbs / 9.5 kg
- Gross Weight: 24.4 lbs / 11.05 kg
