

Pink

White

Product description

The SteelSeries Ikari Laser mouse features programmable macros for RTS and MMO gamers and a high precision sensor suitable for FPS gamers. It allows for true hardware-based sensitivity settings, down to increments of one, which offers users a gaming experience without interpolation. The mouse is completely driverless which enables the mouse to remember settings and macros when plugged into tournament computers - without installing any drivers or software.

The iron.lady QcK is made of high quality cloth material, providing a precise and consistent glide. The wide-screen mouse pad features a specially designed non-slip rubber base which prevents the pads from sliding, no matter what surface it is placed on.

The bundle is available in pink and white and features iron.lady branding.

Special features

- * Programmable macro buttons
- * SteelSeries ExactSens
- * SteelSeries FreeMove Technology
- * Driverless plug-and-play feature
- * Toggle between CPI settings
- * 40.000 Samples Per Second
- * Pressure points reduce friction
