# INTRODUCTION

Welcome to Phanteks!

The P600S combines the best of 2 worlds with its high quality sound dampening panels and the ultra high airflow fabrics from Phanteks. Achieving both a quiet system and a high airflow configuration.

The durable fabric, carefully selected by Phanteks, results in a much lower airflow resistance compared to standard mesh panels. Keeping air speed higher and noise levels lower.

*Phanteks believes that meaningful designs are created through  
the fusion of form and function.*

## CONFIGURE YOUR P600S

The P600S has the most versatile chassis design, providing you with a myriad of options. With so many possibilities to pick from, you can use this overview to choose and plan the best configuration for your build.

**AIR COOLING - P13.**

**STORAGE - P15.**

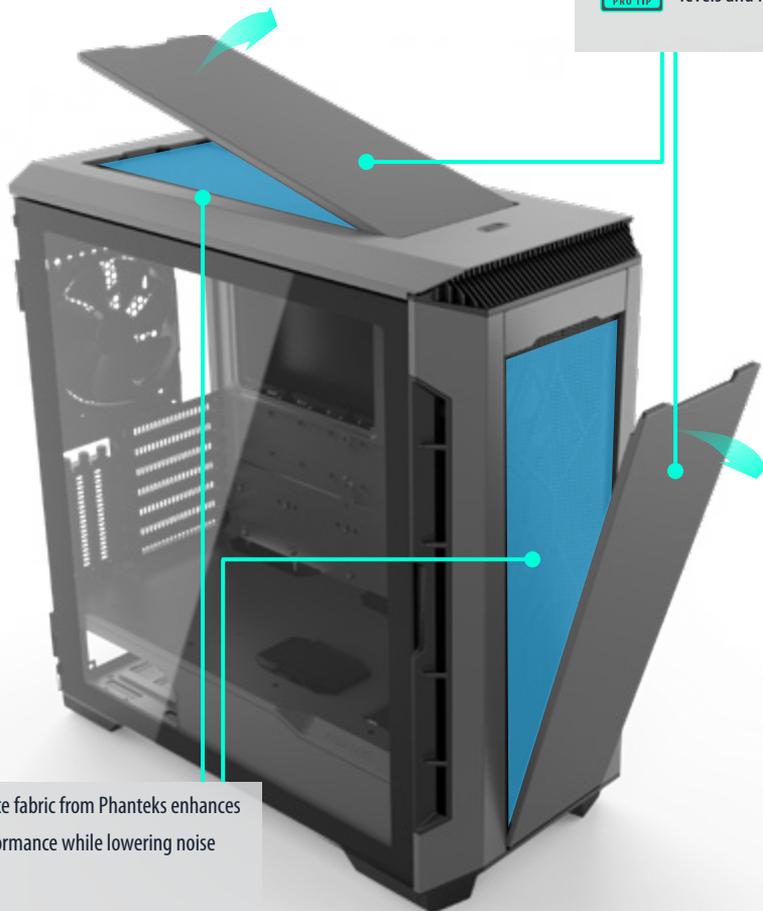

**WATERCOOLING - P18.**

**DUAL SYSTEM - P27.**

# ECLIPSE P600S CONFIGURE YOUR P600S

The P600S can be transformed from a Silent to a High Airflow configuration. The magnetic front and top Silent Covers can be easily removed or installed. By removing the Silent Covers the air intake and outtake surface area is increased dramatically, allowing a much higher cooling capacity.

Heavy and sound dampening panels reduce noise levels and improve acoustics.

High performance fabric from Phanteks enhances the cooling performance while lowering noise levels.

# GET STARTED

## PREPARATIONS

- The P600S case is designed to support installation in a standing position.
- Don't turn on the power to your system until installation is complete.
- Discharge your body's static electric charge by touching a grounded surface before performing any hardware procedure.
- Make sure to consult the manuals of your hardware before installation.

*If you do not feel comfortable with performing the installation procedure, consult a qualified computer technician.*

# INSTALLING MOTHERBOARD

Use the motherboard screws from the toolbox to install your motherboard on the pre-installed standoffs.

## REQUIRES:

## STANDOFF POSITIONING

**ATX / E-ATX** (Pre-installed) 

**Micro ATX** (install extra standoffs) 

*Some motherboards require installation or repositioning of the standoffs. Please consult your motherboard manual for the correct standoff positioning.*

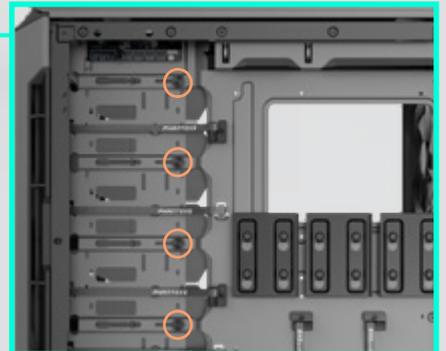

For repositioning standoffs

By loosening the thumb screws you can slide the Cable Covers left and right for optimal cable management.

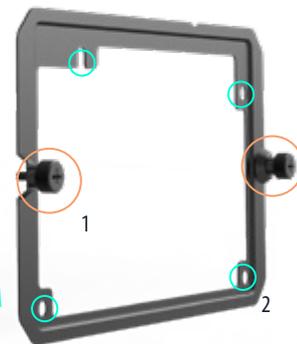

These standoffs have a special collar to keep the motherboard in place when installing vertically.

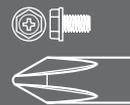

# ECLIPSE P600s INSTALLING POWER SUPPLY

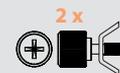

The power supply can be installed by removing the PSU bracket on the rear of the case chassis.

## REQUIRES:

## LOOSEN:
