

Smart Switch 6

Z-Wave plug-in appliance controller with live energy metering.

Small Switch. Powerful Switch. Protective Switch.

The perfect balance between design, size, features and safety, Smart Switch 6 is now 84% smaller than Aeotec's Smart Energy Switch. That's not just the minification of Smart Switch, but a complete re-engineering and re-imagining.

Smart Switch 6 can power devices that draw up to 13 amps of power. But safety comes first, so a different Smart Switch 6 has been engineered for every country it's available in, ensuring that it's never overpowered and never unsafe.

Your expensive electronics are safe with Smart Switch 6 courtesy of its inbuilt surge protector and over-current protector.

Product highlights.

- Plug-in on/off appliance control with real-time energy monitoring.
- 84% smaller than Smart Energy Switch and 43% smaller than Smart Switch Gen 5.
- With side USB port which offers charging for smart phones and tablets.
- Using secure and encrypted wireless technology.
- Let you automatically turn off devices when there is leaking air conditioners or fridges.
- With inbuilt surge protector and over-current protector.
- Over-The-Air firmware updates.
- Optimized antenna range: 150 meters.
- Z-Wave 500 series chip.
- Z-Wave Plus.

Physical Specifications.

- Operating temperature: 0°C to 40°C.
- Dimension: 60×60×34.6mm.
- Input: 230VAC, 13A.
- Max standby power: 0.5W.
- USB output: DC 5V±5%, 1000mA.
- Relative humidity: 8% to 80%.
- Operating distance: Up to 100 feet/30 metres indoors or 300 feet/100 metres outdoors.
