

Recessor for MultiSensor 6

Smart Sensor. Smarter Accessory.

At just 46mm in width, MultiSensor 6 is small enough to be subtle. With Recessor our great new sensor goes from impossibly small to even smaller. Recessor allows MultiSensor 6 to be installed within a ceiling or wall space, with our leading sensor only then emerging 6.1mm from the space!

With Recessor, MultiSensor 6 can still be easily removed in order for the batteries to be changed. Of course, Recessor also allows for a mains power connection so you never have to change batteries at all.

Physical specifications.

- Color: white, matte.
- Size: 86x86x44mm
- Rotation angle: 30°

Simple to install.

Specially crafted to hold MultiSensor 6 in place, Recessor can be used for recessed ceiling or wall installations.
