

RANGE EXTENDER 6

Z-Wave Plug-in repeater and signal amplifier.

The Aeon Labs Repeater is a low-cost Z-Wave mesh network repeater and signal amplifier used to extend the range of communication between Z-Wave products in the same network. The repeater supports Z-Wave explorer frames which allows for Network Wide Inclusion (NWI) and dynamic route discovery for other Z-Wave products that support explorer frames.

With an unobtrusive small form factor, the Aeon Labs Repeater will not block the lower AC outlet (when plugged into the top outlet).

Product highlights.

- Extends the range, reliability and boosts the signal strength of communication between Z-Wave devices.
- Supports Z-Wave Explorer Frames. Repeats Z-Wave messages.
- Small form factor that is not intrusive and does not block other outlets.
- Screw hole secures repeater to wall outlets.

Physical specifications.

- Powered by 230VAC, 50/60Hz.
- Product dimension: 45.9*45.9*59.3mm.
- Operating distance: Up to 492 feet/150 meters outdoors.
