

WATER SENSOR 6

Detect water before it becomes a problem.

Aeon Labs' best selling Water Sensor gets a Gen5 upgrade to become Water Sensor 6. We haven't improved the aesthetics of this, we've redefined what a water sensor can be in the modern home.

- Optimally designed: round and square water sensors don't fit in all the spaces of a home that people need them. Water Sensor 6 does. It's slim, long profile allows to unobtrusively fit in spaces and under cupboards
- Best-in-class 2.5 years battery life
- Built in temperature sensor for water, ambient and floor heating measurements
- Built in buzzer siren
- Floats in event of a flooding
- Built in tilt and vibration sensors for optimised performance
- Built upon our leading Gen5 and Z-Wave Plus technology
- Can detect the presence or absence of water. It doesn't have to just detect floods, it can be used in a tank to determine when the water level gets too low.
- Can be ordered with an installer friendly dock, allow for the use of external probes, rope sensor, and the application of mains power

Specifications

- Detect leaks
- Detect absence of water when used in tank
- Z-Wave Plus
- Supports AES 128 encryption
- Supports OTA firmware updates
- Supports Z-Wave Explorer Frames
- Supports Z-Wave repeater functions when used with mains power
- IP 66 rated
- Product dimensions: 38x85x22(mm) / 1.50x3.35x0.87(in)
- Best in class antenna range: 100 metres in an open space, 30 metres in typically installation
- 1 x CR123A battery powered
- 2.5 years battery life span
- Built in notification buzzer
- Built in network range detection for network analysis and trouble shooting
- PC-110 plastic guarantees better anti-corrosion property.
- Non-scalable golden probe makes sure the waterproof and rust proof properties.
