

ARCTIC RC

Thermodynamic RAM Cooler

Main Features

- Unmatched cooling performance
- High thermal efficiency
- Maximizes overclock ability
- Optimized for natural convection
- Pre-applied adhesive thermal tape
- Applicable to single and double sided modules
- Lightweight; transport safe
- Easy installation

Swiss Low Noise Cooling Solution

ARCTIC RC

Thermodynamic RAM Cooler

The radical long-fin design of the ARCTIC RC notably increases the surface area for efficient heat dissipation. Together with the highly conductive pre-applied thermal tape, the ARCTIC RC achieves up to 34°C reduction of RAM temperature – an outstanding thermal radiation every overclocker is looking for!

Specifications:

Heat Sink:	126.3 L x 1.5 W x 65 H (mm)
Material:	Aluminum
Weight:	25g

* One package contains 4 pieces of Arctic RC

Temperature on 1GB DDR-1600 Module:

Tested with two Ram modules, Freezer 7 Pro and Silentium T Eco 80.
Temperature measured at the 2nd module.
