

# New wireless-AC duo delivers lightning speed HD streaming

Meet the Linksys Smart Wi-Fi Router and Universal Media Connector.  
The latest innovation in wireless-AC technology.

**linksys.com**

## Introducing wireless-AC, the next generation wireless technology.

Wireless AC technology was developed to optimize video and media streaming experiences. The AC speeds allow for content to download faster and large video or music files to stream more quickly than ever before. As your devices and Wi-Fi usage increases, make sure you have the latest wireless technology to get the most out of your connected experiences.

## Transform your media streaming experience.

With the new Linksys Smart Wi-Fi AC Router and Linksys AC Universal Media Connector you can truly optimize your digital media experience at home. The Linksys Smart Wi-Fi AC Router is the ultimate Linksys router that gives you wireless speeds of up to 1750 Mbps (N 450 + AC 1300). The Linksys AC Universal Media Connector Linksys Smart Wi-Fi compliments each these speeds and easily converts your wired devices such as game consoles and Smart TVs to wireless AC for faster video and media streaming.

1. Maximum Performance derived from IEEE Standard 802.11 specifications (draft specifications for 802.11ac). Actual performance can vary, including lower wireless network capacity, data throughput rate, range and coverage. Performance depends upon many factors, conditions and variables, including products used, interference and other adverse conditions. 802.11ac 1300 Mbps in the 5GHz Band is approximately 3 x faster than 802.11n 450 Mbps in the 2.4GHz Band. An 802.11ac adapter will be needed to achieve 11ac data rates and up to 1300 Mbps wireless speeds may be achieved when connecting to other 802.11ac 1300 Mbps devices.

## Linksys Smart Wi-Fi Router AC 1750 HD Video Pro, EA6500.

With a growing number of Wi-Fi devices in the home, the Linksys Smart Wi-Fi AC 1750 Router provides the bandwidth and fast speed needed to optimize your online experiences. Also, the Linksys Smart Wi-Fi Router includes SimpleTap technology to easily add Wi-Fi devices. It also allows you to create a Smart Wi-Fi account to get access to Tools and Apps that help you easily control, optimize and access your home network from anywhere, at any time.

- Latest Draft 802.11ac wireless technology<sup>1</sup>
- Up to N 450 + AC 1300 Mbps speed<sup>1</sup>
- 2 USB ports to simultaneously share printers and storage<sup>2</sup>
- SimpleTap™ Technology to add Wi-Fi and NFC-enabled devices to your network
- 3D antenna array allows for wall mounted or table top display
- Four gigabit ethernet ports for fast wired connections
- Smart Wi-Fi Tools

## Linksys Wireless-AC Universal Media Connector, WUMC710.

Easily connect up to four Ethernet-enabled entertainment devices to your high-performance Wireless-AC network, the next generation Wi-Fi with speeds approximately 3x faster than Wireless-N<sup>1</sup>. For optimal performance, pair with a Wireless-AC router.

- Latest Draft 802.11ac Wireless Technology
- Ultimate Speeds- Up to 1300 Mbps<sup>1</sup>
- Four gigabit ethernet ports for fast wired connections
- Quality of Service (QoS) for Smooth Video Performance
- Wi-Fi Protected Setup<sup>3</sup>

2. May require a software/firmware update available for download at [linksys.com/support](http://linksys.com/support).

3. Secure push-button setup works with devices that support Wi-Fi Protected Setup™ like Cisco Linksys EA-Series routers and others.

# Linksys Smart Wi-Fi

## A new way to optimize your connected life.

With your Linksys Smart Wi-Fi router you have the opportunity to get an ever-growing set of new capabilities through mobile apps. These mobile apps will empower you to easily enhance and control your connected lifestyle.

## Why Smart Wi-Fi?

Enjoy powerful wireless performance plus Smart Wi-Fi Tools to do more:

- Utilise Apps to customise your Wi-Fi home
- Get anytime, anywhere access to your home network
- Enable intelligent media prioritisation for HD video streaming and online gaming
- Control kids content even when you are away from home
- Turn on/off Internet connectivity to devices in the home from anywhere
